

Since 1978

Caliper Brake Systems

www.alcanotomotiv.com

Alcan Otomotiv today is one of the biggest company in the market of caliper repair kits.

1978

Founded in 1978. Since 1990 produced various spare parts for the automotive sector leaders.

1990

Between 1990 – 1995 worked with DT (Diesel Technic) being supplier to them with different types of parts again due to their demands.

1995

From 1995 till now we are still supplier for the BMC factory in Turkey which is z-cam brakes. Also in Turkey we are the leading z-cam brakes producer for FORD, VOLVO (which z-cam uses) and BMC trucks in Turkey, we have a very well know brand in Turkey. **In 1995 also started** to produce the compressor kits for commercial vehicles until 2004.

2004

As the experience in Brake system from the foundation in 2004 we focused on the Brake systems for the disc calipers as we gave up compressor range so we had decided to be leader in this range. Before 2004 we were just manufacturing some of the caliper parts and supplying to some companaies in Turkey till 2004.

∞

After 2004 we started to make full range of the Caliper kits and entered the market under brand ALCAN with the consistent quality policy. For **ALCAN** the aim is consistent quality. Dedicated to the best quality for the competetive prices with good service.

Our main group types are **Knorr, Meritor, Wabco, Haldex, Iveco, SAF, Brembo and Z-cam** type caliper kits for Mercedes, Man, Volvo, Scania, Daf, Renault, Iveco commercial vehicles and all types of trailers.

SAF

After the years and the reason of our policies we are now exporting to all over the world.

Mainly to European countries, South America, Australia, USA, Canada, UK, Israel and also we are well known brand in Russian Federation as well. We have one distributor in Turkey and we are just supplying our parts now for Turkey market and they are the biggest company in Turkey.

We are planning to develop our sales agents all over the world and want to be in at least 50+ countries by 2026 under ALCAN brand.

We are also supplier for the big companies all over the world under their own brand as we have agreement with them yearly.

All over the World...

As **ALCAN Automotive**, our vision is "To sell parts is good, to create longterm relationship is better"
Company has been certificated by **TS EN ISO 9001/2000 Quality Management System** , **CE** and **ISO 14001:2015** Certiface

How we stand different than other competitors in Turkey is we know the system and have the Know-How policy in Caliper Parts.

We have 3 different ways to test;

- 1- On the Caliper after the finish we test the parts whether the parts fit the Caliper properly or not.
- 2- On the truck or bus 6 months to see the valid date of the part and how it works.
- 3- For the metal parts; corrosion tests, salt test, water test. For the rubber parts silicone tests, material test and individual tests for all single parts.

Reason of the above test we can give 1 (one) year warranty to our clients if the Caliper fully changed with ALCAN parts.

We use finest quality in all metal parts rawmaterial and apply the extra application to make the strong and more life for our parts.

For the rubber parts we know that in Caliper the rubber must be perfect quality so we use same quality with the original ones fully silicone.

In plastic parts we are dedicated to full plastic material not mixed material as the others companies.

Screws,springs we only use the original values.
