---

**Alcan Otomotiv** today is one of the biggest company in the market of caliper repair kits.

- ***Founded in 1978..***

since 1990 produced various spare parts for the automotive sector leaders.

- ***Between 1990 - 1995***

worked with DT (Diesel Technic) being supplier to them with different types of parts again due to their demands.

- ***From 1995 till now***

we are still supplier for the BMC factory in Turkey which is z-cam brakes. Also in Turkey we are the leading z-cam brakes producer for FORD, VOLVO (which z-cam uses) and BMC trucks in Turkey, we have a very well know brand in Turkey.

- ***In 1995 also started to produce the compressor kits***  
for commercial vehicles until 2004.
- ***As the experience in Brake system from the foundation in 2004***  
We focused on the Brake systems for the disc calipers as we gave up compressor range so we had decided to be leader in this range. Before 2004 we were just manufacturing some of the caliper parts and supplying to some companies in Turkey till 2004.
- ***After 2004***  
we started to make full range of the Caliper kits and entered the market under brand ALCAN with the consistent quality policy. For ALCAN the aim is consistent quality. Dedicated to the best quality for the competitive prices with good service.

Meritor

Knorr

Wabco

Haldex

Iveco

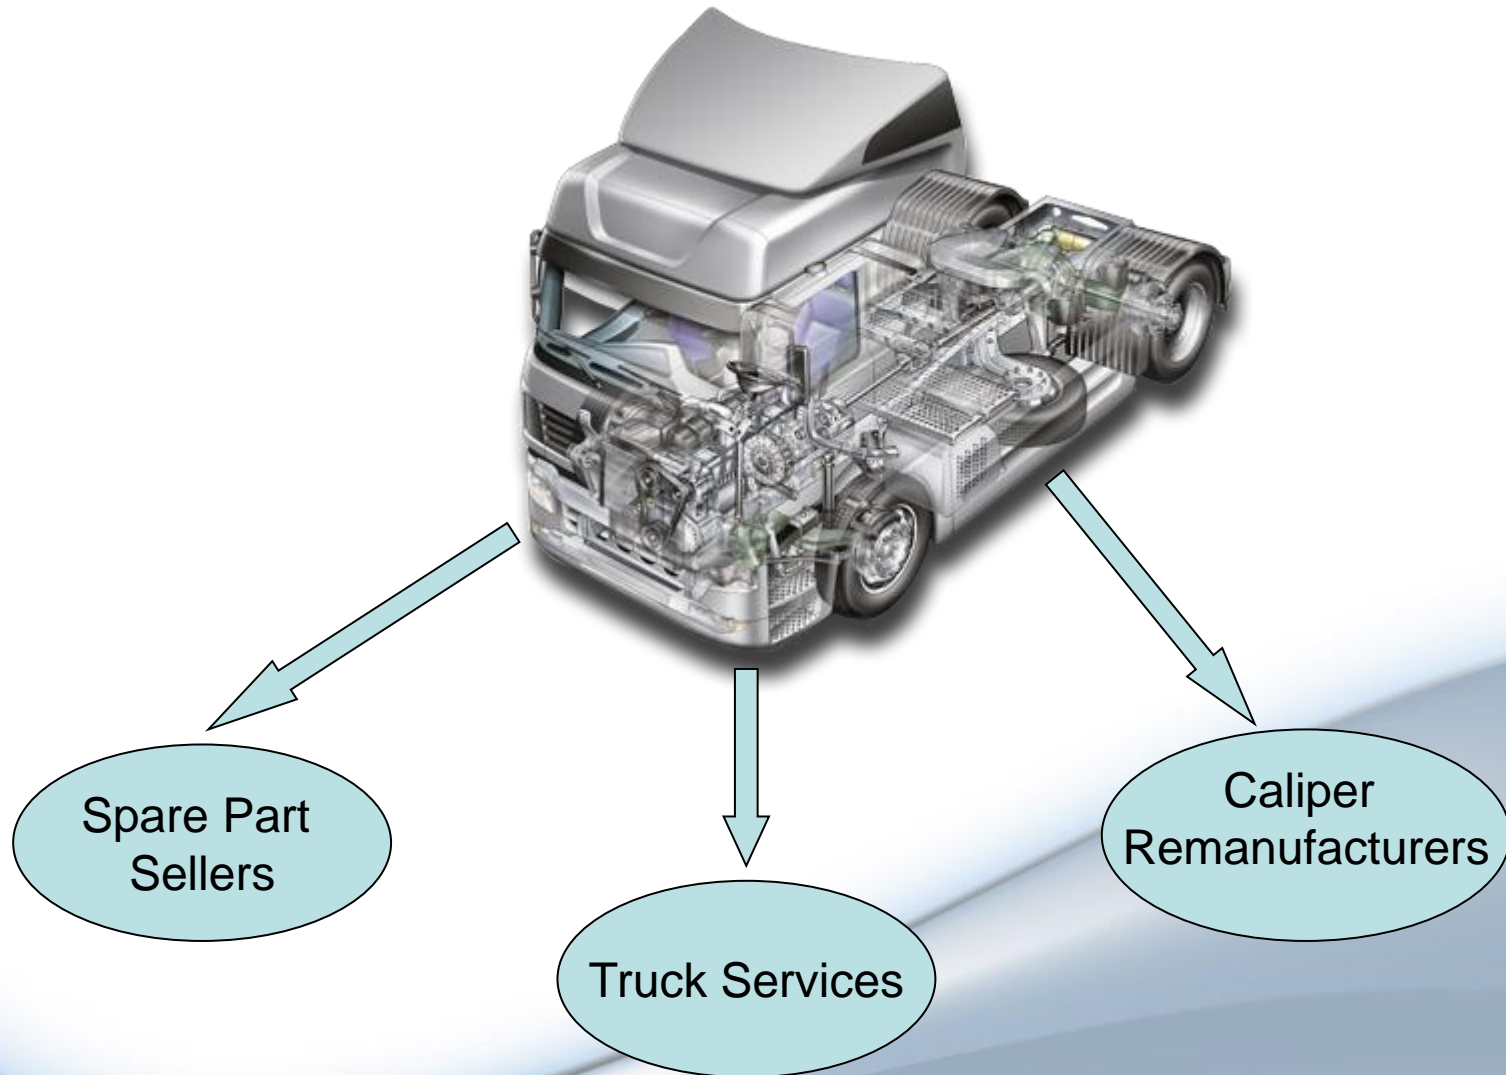

Brembo

SAF

- Our main group types are **Knorr, Meritor, Wabco, Haldex, Iveco, SAF, Brembo** and **Z-cam** type caliper kits for **Mercedes, Man, Volvo, Scania, Daf, Renault, Iveco** commercial vehicles and all types of trailers.

- After the years and the reason of our policies we are now exporting to all over the world.

Mainly to European countries, South America, Australia, USA, Canada, UK, Israel and also we are well known brand in Russian Federation as well. We have one distributor in Turkey and we are just supplying our parts now for Turkey market and they are the biggest company in Turkey.

We are planning to develop our sales agents all over the world and want to be in at least 50 countries by 2020 under ALCAN brand.

We are also supplier for the big companies all over the world under their own brand as we have agreement with them yearly.

- As **ALCAN Automotive**, our vision is “To sell parts is good, to create longterm relationship is better”
- Company has been certificated by **TS EN ISO 9001/2000 Quality Management System** , **CE** and **ISO 14001:2015** Certiface

- How we stand different than other competitors in Turkey is we know the system and have the Know-How policy in Caliper Parts.

We have 3 different ways to test;

- 1- On the Caliper after the finish we test the parts whether the parts fit the Caliper properly or not.
- 2- On the truck or bus 6 months to see the valid date of the part and how it works.
- 3- For the metal parts; corrosion tests, salt test, water test. For the rubber parts silicone tests, material test and individual tests for all single parts.

Reason of the above test we can give 1 (one) year warranty to our clients if the Caliper fully changed with ALCAN parts.

- We use finest quality in all metal parts rawmaterial and apply the extra application to make the strong and more life for our parts.

For the rubber parts we know that in Caliper the rubber must be perfect quality so we use same quality with the original ones fully silicone.

In plastic parts we are dedicated to full plastic material not mixed material as the others companies.

Screws,springs we only use the original values.

- We are planning to be on the list of 100 exporters in Turkey till the 2020 now we are in the first of 200 list.
- In 2016 we moved our new factory which is built on the 7000 square meters.
- New test devices, remanufacturing area, new manufacturing machines (at least more than 50 machines)

Thank you for your attention!
